Merhaba arkadaşlar, siz benim hikayemi biliyor musunuz ?

Bir gün tavanımdaki yıldızlara bakarak hayal kuruyordum. Daha sonra gözlerimi kapadım ve...

Kendimi yıldızların arasında buldum. Gezegenlerin arasında dolaşıyor, yıldızların üzerinde zıplıyordum.

O da  
neydi ? Yoksa bu  
Televizyonda gördüğüm  
Türksat 5B'mi ?

Peki arkadaşlar, siz uydu nedir biliyor musunuz ?

Uydu, bir gezegenin ya da başka bir uydunun etrafında belirli bir yörünge-  
de dönen gök cismi. Yapay uydular-  
dan ayırmak amacıyla doğal uydu  
veya tabii uydu olarak da adlandırılır.  
Dünya'nın tek doğal uydusu Ay'dır.

Yapay uydular, insanoğlunun geliştiri-  
p Dünya'nın veya başka gezegenle-  
rin yörüngesine yerleştirdiği uydular-  
dır. Bu uydular genellikle yarı-bağımsız  
bilgisayar kontrollü sistemlerdir.

Kahramanımızı ve uzayı ne kadar tanıyorsun, aşağıdaki isimleri görsellerle eşleyebilir misin? Resme bak, yandaki ismi bul ve kareye yaz. TÜRKSAT Sana yol gösterecektir. haydi şimdi çözme zamanı...
